DELIVERING DATA AT MISSION SPEED

PROVIDERS

With GME, you gain immediate access to 350+ vetted and monitored data vendors. Standard terms reduce acquisition time from months to hours.

- Includes well-known vendors and small/nontraditional vendors with bespoke data exclusively available through GME.
- New providers added weekly based on strategic assessments and customer needs.

DATA EVALUATION & SOLUTIONING

Our team models and scopes precise mission solutions, assessing data quality and fit before you license.

- GME's team includes experienced DoD and IC experts.
- When needed, we engage with trusted partners specializing in data evaluation, AI modification detection, and more.

THE MILL

Our secure platform empowers users with robust data discovery, samples, schemas, pricing, and API documentation, all while maintaining customers' anonymity.

- Admin oversight and reporting provides visibility into organizational activity and licensing.
- Use tokens to further speed acquisition and distribute resources across teams.

DATA ENGINEERING

Our engineering services, when needed, connect new data sources to your preferred platform and manage ETL and data fusion (fused tracks).

- Current integrations include Palantir, Anduril, TAK, Ditto, and government-approved cross-domain solutions.
- Data is processed in secure, private enclaves.

EXPLOITATION & DELIVERY

We deliver formatted data directly to your preferred platform or application.

- Enhance data dissemination across mission applications and edge mesh networks.
- Optimize resource allocation and increase mission readiness.
- Flexible delivery options include APIs, streaming, and bulk.

The data you need... when and where you need it

A FLEXIBLE ACQUISITION MODEL

VAST DATA SELECTION

GME offers data spanning a wide range of data types, categories, and geographies. Data is available via non-attributable APIs, streaming, and bulk downloads.

VETTED PROVIDERS

Each of our 350+ data vendors undergoes rigorous vetting and monitoring.

EASE OF ACQUISITION

GME's Data Solutions Team helps you find the best data for your needs and negotiates with vendors to scope it to your exact requirements.

UNMATCHED SPEED

Get mission-ready data in hours, not months. Standard terms across providers, data tokens, APIs, and streaming data allow for the fastest delivery of critical data into your system.

POWERFUL DISCOVERY

GME's secure platform, the Mill, offers powerful searching, linking, and comparison capabilities, plus samples, schemas, pricing, and API documentation.

DEPLOY WITH CONFIDENCE

Data integrations enhance dissemination across mission applications and edge mesh networks. Data is delivered to your preferred platform.

GET STARTED TODAY

Using the Mill is free. You only pay when you license data. Contact us at info@gristmillexchange.com for an account.
